Head of Data and Service with 20 years of education sector leadership, overseeing MIS support, training and delivery to schools nationwide across a major education services group. A proven track record of leading complex service mergers, driving school improvement across MATs and LA settings and building high-performing operational teams.

EER307

Personal Summary

I am a Head of Service with over 20 years of hands-on leadership experience in the education sector, managing dynamic and fast-growing organisations. A proven track record of running efficient support services, leading teams of up to 25 staff, and restructuring operations to generate £1.5M in service revenue. My career spans work with global multinationals, Multi Academy Trusts and the public sector, where I've driven school improvement, overseen complex projects and built strong, productive relationships with schools, academy groups and local authorities.

I'm a firm believer in visible, hands-on management, balancing day-to-day operational support with strategic oversight to ensure services align with organisational values. I have extensive experience delivering traded IT services under Service Level Agreements that enhance both operational efficiency and organisational performance across public and private sectors.

I am now seeking a challenging management or director-level role that builds on my skillset within ambitious Education organisation where I can contribute to strategic growth, service excellence and high-performing teams.

Skills and Specialisms

Operations Director | MIS Head of Service | School Improvement Delivery | Digital Transformation | Education Sector IT Solutions | SaaS | Systems Integrator | MIS Support & Implementation Management | Managed Service Provider (MSP) ICT & Project Management and implementation | Enable school best value | Improving MAT, School & pupil outcomes.

- Experience across multiple MIS systems and a track record of improving customer retention.
- Establishing solutions for school leaders around MAT and school improvement
- Full UK working rights | Full UK driving licence.

Work Experience

Head of Data and Service

Sept 2021 – Present: Educational Group

Responsible for the overall development and delivery of MIS Support, Helpdesk, Training Service, Consultancy, and technical services to vast range of schools nationwide.

Achievements & highlights

Led the successful integration of two existing business units and their support teams into a unified operation, consolidating chargeable services and streamlining customer service delivery.

Collaborated with multi-functional teams across IT, Sales, Marketing, Finance, and Executive Leadership to deliver a seamless merger, improving operational efficiency and ensuring business continuity. Successfully led, developed, and trained a newly integrated team, uniting individuals from diverse backgrounds into a high-performing unit. This cohesive team was instrumental in providing comprehensive support to scores of schools, each operating under varying service level agreements.

I have consistently ensured the delivery of high-quality services, taking the lead on multiple projects over the past three years. This was particularly critical during a business merger, where leadership efforts were essential in maintaining and strengthening key business relationships.

Spearheading growth and school-improvement initiatives for a Multi Academy Trust and individual schools, collaborating with numerous MATs and settings to standardise processes, enhance outcomes, and embed best practice, ultimately creating meaningful impact on pupils' educational experiences.

Developed and led a consultancy project focused on implementing Management Information System (MIS) changes within a Multi-Academy Trust. The success of this initiative secured business retention and firmly positioned the organisation as a School Improvement, strategic and intelligent partner.

Pioneered the development of support services for cutting-edge school technologies, overseeing everything from training to seamless implementation and subsequently marketing and selling these complete solutions to schools and strategic partners.

Collaborated with schools and local authorities to provide best-practice guidance and implement strategic initiatives that drive holistic school improvement, with expertise spanning behaviour management, attendance, academic attainment, and parental engagement across all MIS areas.

Took responsibility for training and upskilling the internal team, equipping them to effectively promote MIS-related services while strengthening engagement with schools and Multi Academy Trusts, ensuring the organisation is consistently viewed as a trusted and intelligent partner.
